**RE: Wheeler Memorial Library  
Structural Analysis**

Dear Jess,

Due to the very limited nature of any proposed structural modifications to the Wheeler Memorial Library, our review of the existing building and structure, the design work we've done in the past with the building, and the fact that we are removing the majority of the stack loading from the existing building, I feel the information we have is sufficient for our current Schematic Design. We do not feel any additional structural analysis of the current building is necessary at this time.

Sincerely,

A handwritten signature in black ink, appearing to read "P. O'Brien", with a large, stylized flourish at the end.

Phillip O'Brien, Principal  
Johnson Roberts Associates Inc.
